CONTENTS OF VOLUME 7

NUMBER 1

ORIGINAL RESEARCH ARTICLES

Identification of Finite Impulse Response Models with Continuum Regression
B. M. Wise and N. L. Ricker 1

Resolution of Strongly Overlapping Two-way Multicomponent Data by Means of Heuristic Evolving Latent Projections
Y.-Z. Liang, O. M. Kvalheim, A. Rahmani and R. G. Brereton 15

The Kernel Algorithm for PLS
F. Lindgren, P. Geladi and S. Wold 45

Compression of *n*-th Order Data Arrays by B-Splines. Part 1: Theory
B. K. Alsberg and O. M. Kvalheim 61

BOOK REVIEW 75

NUMBER 2

ORIGINAL RESEARCH ARTICLES

Eliminating Complex Eigenvectors and Eigenvalues in Multiway Analyses Using the Direct Trilinear Decomposition Method 77
S. Li and P. J. Gemperline

Investigation of Copper(II)–Ethylenediaminetetraacetate Complexation by Window Factor Analysis of Ultraviolet Spectra
W. Den and E. R. Malinowski 89

Improvements to the Classification Performance of RDA
S. Aeberhard, D. Coomans and O. de Vel 99

Advances in Second-order Calibration
Y. Wang, O. S. Borgen, B. R. Kowalski, M. Gu and F. Turecek 117

SHORT COMMUNICATION

Classification Methods for Multivariate Quality Parameters
C. Weihs, W. Baumeister and H. Schmidli 131

LABORATORY PROFILE 143

ANNOUNCEMENT 149

NUMBER 3

EDITORIAL 151

ORIGINAL RESEARCH ARTICLES

A Global Perspective on Multivariate Calibration Methods
P. M. Lang and J. H. Kalivas 153

Finding Suspected Causes of Measurement Error in Multivariate Environmental Data
M. A. Stapanian, F. C. Garner, K. E. Fitzgerald, G. T. Flatman and J. M. Nocerino 165

Representation of Spectra by Continuous Functions
B. K. Alsberg 177

Detecting and Adjusting for Non-linearities in Calibration of Near-infrared Data Using Principal Components
S. D. Oman, T. Naes and A. Zube 195

LABORATORY PROFILE 213

BOOK REVIEWS 223

NUMBER 4

REVIEW ARTICLE

Non-linear Mapping for Structure–Activity and Structure–Property Modelling
D. Domine, J. Devillers, M. Chastrette and W. Karcher 227

ORIGINAL RESEARCH ARTICLES

Application of Orthogonal Expansion to Mapping and Modelling
Z. Cheng, E. Zhu and N. Chen 243

Graphics for Linearity and Selectivity and Prediction Diagnostics for Multicomponent Spectra
P. J. Brown 255

Use of the Kalman Filter for Multivariate Calibration in a Real System and its Comparison with CLS and Pure Component Calibration Methods
L. V. Pérez-Arribas, F. Navarro-Villoslada, M. E. León-Gonzalez and L. M. Polo-Díez 267

Determination of a Multivariate Detection Limit and Local Chemical Rank by Designing a Non-parametric Test from the Zero-component Regions
Y.-Z. Liang, O. M. Kvalheim and A. Höskuldsson 277

A Test of Significance for Partial Least Squares Regression
I. N. Wakeling and J. J. Morris 291

NUMBER 5

REVIEW ARTICLE

Multivariate Exploratory Data Analysis and Graphics: A Tutorial
C. Weihs 305

ORIGINAL RESEARCH ARTICLES

Optimization in Organic Synthesis. An Approach to Obtaining Kinetic Information by Sequential Response Surface Modelling. Outline of the Principles
R. Carlson, A.-K. Axelsson, A. Nordahl and T. Barth 341

Constrained Background Bilinearization with a Generalized Simulated Annealing Algorithm
Yulong Xie, Jihong Wang, Yizeng Liang, Kai Ge and Ruqin Yu 369

Assessment of the Effective Rank of a (Co)variance Matrix: a Non-parametric Goodness-of-fit Test
V. Tomisic and V. Simeon 381

The Geometry of Multivariate Object Preprocessing
S. N. Deming, J. A. Palasota and J. M. Nocerino 393

Multivariate Selection of Variables in Industrial Quality Control: Optimizing Aviation Fuel Final Control
J. M. Andrade, D. Prada, S. Muniategui, B. Gomez and M. Pan 427

SHORT COMMUNICATION

Comments on the Residual Bilinearization Method
Y. Wang, O. S. Borgen and B. R. Kowalski 439

LABORATORY PROFILE 447

NUMBER 6

EDITORIAL 453

REVIEW ARTICLE

Statistical Thinking and Technique for QSAR and Related Studies. Part I: General Theory
M. Stone and P. Jonathan 455

ORIGINAL RESEARCH ARTICLES

Body Diagonalization of Core Matrices in Three-way Principal Components Analysis: Theoretical Bounds and Simulation
R. Henrion 477

Standard Errors in the Eigenvalues of a Cross-product Matrix: Theory and Applications
N. M. Faber, L. M. C. Buydens and G. Kateman 495

Robust Principal Component Analysis by Projection Pursuit
Y.-L. Xie, J.-H. Wang, Y.-Z. Liang, L.-X. Sun, X.-H. Song and R.-Q. Yu 527

SHORT COMMUNICATIONS
Effect of Standardization on Fragment-based Measures of Structural Similarity
P. A. Bath, C. A. Morris and P. Willett 543

PLS Fits Closer than PCR
S. De Jong 551

SOFTWARE REVIEW 559
